Professional Summary

Full Stack Developer specializing in MERN stack (MongoDB, Express.js, React.js, Node.js) with 1+ years hands-on development experience, including a 1-month internship at VDart Academy. Successfully built and deployed 3 production-ready applications: a learning platform with real-time course enrollment, event management system with booking functionality, and NLP-powered complaint categorization. Proficient in RESTful API design, responsive UI/UX development, database architecture, and cloud deployment. Seeking Full Stack Developer (MERN) roles in growth-focused organizations.

Technical Skills

Languages: JavaScript, Python, HTML5, CSS3

Frameworks: React.js, Node.js, Express.js, Django REST Framework

Databases: MongoDB, MySQL

Tools & Platforms: Git, GitHub, VS Code, Postman, Power BI, Render, Vite

Core Concepts: REST APIs, JWT Authentication, Real-time Data Sync, NLP, OOPs

Projects

Learning Management System (MERN Stack) [View Live](#)

React / Node / MongoDB

- Built full-stack learning platform supporting 3-5 courses with real-time enrollment tracking and progress dashboards using React.js, Node.js, MongoDB.
- Designed 5-8 RESTful API endpoints for course management, enrollment, authentication and analytics with JWT-based security.
- Deployed frontend and backend on Render; responsive UI optimized for both desktop and mobile views.

GitHub: github.com/aathil08/Learning-management-system

Event Management Platform (MERN Stack)

React / Node / MongoDB

- Developed full-stack application supporting 10-20 concurrent bookings with event creation, real-time booking management and admin dashboards.
- Implemented 3-5 core features: event creation, ticket booking, event filtering, user/admin dashboards and analytics panel.
- Integrated frontend-backend via REST APIs for real-time synchronization on bookings and availability; modern responsive UI/UX.

NLP-Enhanced Complaint Management System

Python / NLP / TF-IDF

- Built AI-powered municipal complaint system using NLP; classifies complaints into 5-10 categories and routes to appropriate departments automatically.
- Implemented TF-IDF vectorization and Naive Bayes classification; demonstrated categorization accuracy through structured testing.
- Designed modules for tracking, department routing, priority assignment and dashboards with complaint history and status updates.

Internship Experience

Full Stack Development Intern – VDart Academy

July – August 2025

Trichy, Tamil Nadu

- Completed full stack web development training with a core team of 3-4 members on React.js, Node.js, Django REST Framework and MySQL.
- Successfully delivered 2-3 production-ready features including user authentication, database integration and REST API endpoints under code review.
- Collaborated through daily standups, code reviews and pair programming sessions to solve real-world development challenges.

Education

B.E – Computer Science and Engineering	May 2026
M.I.E.T Engineering College, Trichy CGPA: 8.13/10	
H.S.C	2021 – 2022
Rice City Matric Hr. Sec. School, Aduthurai 80.83%	
S.S.L.C	2019 – 2020
Rice City Matric Hr. Sec. School, Aduthurai 81.2%
